

# Online Data Backup for the education sector

## Datahive™ for Education

Data is at the heart of every business and organisation

With more and more of our everyday activities being performed online, loss of data is a very real and continual risk to organisations all over the World. Backing up your data should be one of the most important considerations for your organisation.

- Is your critical data backed up completely, separately and securely?
- Do you have a Disaster Recovery Plan in place?
- Would your data be recoverable from accidental or malicious loss?

*We offer a simple, cost effective solution to protecting your data*

## Our Cloud Backup Solution - Datahive™ for Education

Cloud backup, also known as online backup, offsite data backup or remote backup, is a method of safeguarding your valuable data from loss. All files, folders, emails, databases, virtual machines and the contents of an entire hard drive can be regularly and safely backed up via an internet connection, to a remote and highly secure storage facility.

Datahive™ is a fully managed backup service which safeguards your files & emails from loss, theft or corruption. Its simplicity, performance & encryption features deliver true peace of mind by protecting against human error as well as nullify criminal activity.

### Why work with VSL?

#### Simple

This backup service has been created with the education sector in mind.

#### Secure

Our automated cloud, online backup service secures your encrypted data within our UK based, state-of-the-art datacentres.

#### Affordable

Our solution ensures you only pay for the storage you require. Discounts are available on all our products for those within the the education sector.

### Why Datahive™?

At VSL we recognise that in the education sector it is crucial for data to be kept securely encrypted and backed up yet accessible, should you ever need it.

Backups with Datahive™ for Education are completely automatic; your data is compressed, encrypted and then securely transferred to VSL's multiple UK data centres. The transfer of your data is completed via a secure 256 bit SSL (Secure Socket Layer) channel, which is applied whilst in flight and at rest. This data is then stored securely off-site in state of the art, ISO 27001 certified UK data centres.

**As an educational establishment, you must ensure that your data is backed up securely and offsite, complying to government legislation. VSL offers the ideal solution!**

## Datahive™ for Education - How Does It Work?

Once the initial upload of data is completed, either via a secure network upload or encrypted seed load, Datahive™ for Education will then only run incremental backups. This means that only data that has changed since the previous backup job are uploaded. This greatly reduces the impact on valuable bandwidth and increases the speed of the backup.

You have the flexibility to schedule your backup job to run daily or, multiple times throughout the day, whatever meets your needs.

With VSL you can feel confident in the knowledge that all of your critical data is backed up across VSL's secure data centres. Having your data replicated across our multiple sites, provides ultimate resilience – and peace of mind!

## Features & Benefits

online data backup made simple

### Secure

Datahive™ enforces 256bit AES encryption to all data in flight and at rest for the education sector. This encryption is maintained until the unique account de-cryption key is applied, ensuring maximum security.

### Unlimited UK Support

All Datahive™ plans include unlimited email & telephone support which means you can rely on expert help and knowledge without the fear of additional fees.

### UK Data Centres

All your data is backed up to state of the art, award winning UK data centres. All are ISO 27001 accredited, allowing your school to comply with the latest legislation/guidelines.

### Scalable

All Datahive™ plans are infinitely scalable. Storage can be increased in seconds meaning your backups continue uninterrupted as your data requirement grows.

### Unlimited Backup & Restore

Unlimited backups and, crucially, restores which means you never receive unbudgeted costs. Backups are automatic so no human intervention is needed.

### Money Back Guarantee

All Datahive™ plans are supported by a money back guarantee, which means if the service fails to deliver published standards you are entitled to a refund.

### Initial Seed Load Service

To ensure a usable backup is available in the shortest possible time your data can be transferred from a seed loaded drive directly into the Datahive™ cloud storage.

### Disaster Recovery

If you have a complete data loss we are close at hand to deliver in double quick time a seeded drive with all of the replacement data to a location of your choice.

- ✓ No Additional Hardware Needed
- ✓ No Human Intervention Needed
- ✓ We Monitor All Backups
- ✓ Cost Effective Auto Backup
- ✓ Restore Your Data Easily
- ✓ Cloud Management Console & Reporting
- ✓ Completely Secure & UK Based
- ✓ Money Back Guarantee
